

BATTERY CARE | Maintenance Instructions for a Long Battery Life

Charging Battery(s)

- Plug Mobile Warming charger into AC wall socket and connect battery(s) to AC charger connectors.
- When indicator light(s) are "Red" battery(s) are charging.
- When indicator light(s) turn "Green" battery(s) are fully charged and ready for use or storage.
- Always charge batteries indoors.
- Always use Mobile Warming Chargers to charge batteries. Failure to do so could result in bodily injury, fire, or damaged batteries.

Battery Use

- Fully charge Lithium-Ion batteries before use.
- Avoid running Lithium-Ion batteries completely dead this will result in performance problems and reduced battery life.
- Lithium-Ion batteries by nature have diminished capacity output in extremely cold temperatures. We recommend to keep batteries inside the garment to maximize battery performance.
- Charge every 3 months to maintain battery life.

Battery Storage

- Disconnect battery from garment.
- Power off battery(s) if applicable.
- Fully charge battery(s) following steps above.
- Keep battery(s) in cool dry place out of direct sunlight
- Charge every 3 months to maintain battery life.

WARNING!

Do not use battery if you notice a change of shape (lumps), over-heating when charging or if rust or corrosion on the battery connectors is found.
